Demo controls

Attack to inject

Flood: far too many packets

Inject attack

Reset to demo data

BLE attack monitor

Bluetooth Low Energy traffic, checked for unusual behaviour in short time windows.

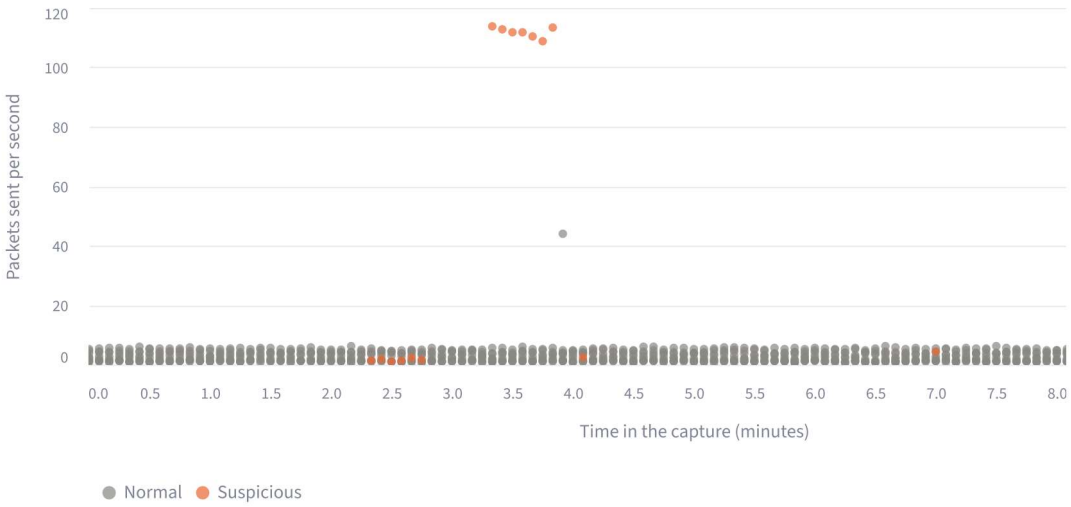

Reset to the original demo data (seed 42) in 2.1 seconds.

Device addresses seen	Packets analysed	Time windows checked	Suspicious windows
17	17,534	970	23

Activity over time

Show on the chart

Packets sent per second | Signal strength variation (dB) | Off-rhythm gaps (%)

Each dot is one device address during one 5-second window.

Suspicious windows

Device address	Time window	Unusualness (0-1)	Packets in window	Why it was flagged
01:14:A1:09:A0:62	9:35-9:40	0.799	48	Signal strength varied by 21 dB within 5 s vs. a typical 4
01:14:A1:09:A0:62	9:50-9:55	0.794	48	Signal strength varied by 22 dB within 5 s vs. a typical 4
01:14:A1:09:A0:62	9:40-9:45	0.792	46	Signal strength varied by 25 dB within 5 s vs. a typical 4
01:14:A1:09:A0:62	9:20-9:25	0.769	42	Signal strength varied by 21 dB within 5 s vs. a typical 4
01:14:A1:09:A0:62	9:30-9:35	0.769	38	Signal strength varied by 21 dB within 5 s vs. a typical 4
01:14:A1:09:A0:62	9:45-9:50	0.766	39	Signal strength varied by 21 dB within 5 s vs. a typical 4
01:14:A1:09:A0:62	9:25-9:30	0.754	46	Signal strength varied by 20 dB within 5 s vs. a typical 4
01:14:A1:09:A0:62	9:55-10:00	0.737	32	Signal strength varied by 24 dB within 5 s vs. a typical 4
1D:32:E8:4B:F2:19	3:50-3:55	0.728	567	Sent 113.4 packets/s vs. a typical 2.4/s
1D:32:E8:4B:F2:19	3:20-3:25	0.728	569	Sent 113.8 packets/s vs. a typical 2.4/s

Windows with only a few packets are less reliable, so the Sensitivity section below can ignore them.
